| | |
|------------|--------|
| Web server | Apache |
|------------|--------|

| | |
|-----|--------|
| PHP | 5.5.38 |
|-----|--------|

| | |
|----------------------|----------|
| PHP register globals | Disabled |
|----------------------|----------|

| | |
|----------------|---------|
| PHP extensions | Enabled |
|----------------|---------|

| | |
|------------------|---------|
| Database support | Enabled |
|------------------|---------|

| | |
|-------------------------------|-------------|
| Database 4 byte UTF-8 support | Not enabled |
|-------------------------------|-------------|

4 byte UTF-8 for mysql is not activated, but it is supported on your system. It is recommended that you enable this to allow 4-byte UTF-8 input such as emojis, Asian symbols and mathematical symbols to be stored correctly. See the [documentation on adding 4 byte UTF-8 support](#) for more information.
